## DIMENSIONES INTERCONEXIÓN IEC 169-15

## INTERFACE DIMENSIONS IEC 169-15

Los conectores de la serie SMA (SubMiniatura A) son los de mayor utilización en aplicaciones de microondas (comunicaciones, satélite, medidas,...). Es un conector de precisión y como tal, tiene unas características que lo hacen fiable, robusto, con alta estabilidad y bajo VSWR. Pertece al grupo de los microcoaxiales con acoplamiento a rosca. Puede ser utilizado incluso por encima de 18 GHz (máximo 24 GHz). La impedancia característica es de 50 Ω.

Disponemos de diferentes versiones: panel, con dieléctrico extendido, aéreo, para montaje superficial (SMD), para circuito impreso (PCB), aplicaciones microstrip, planar... Y en cuanto al montaje del cable, disponemos de versiones soldadas, prensa estopa, crimp,...para cables flexibles y semirígidos.

normativa: IEC 169-15

SMA series (SubMiniature A) are the most used connectors for microwave applications (communication, satellite, measurement,...). SMA are precision connectors. They have good properties: reliability, strength, high stability and very low VSWR. They belong to thread coupling microcoaxial group. SMA series are useful upper 18 GHz (maximum 24 GHz). Characteristic impedance is 50 Ω.

We offer different versions: panel (extended dielectric connectors), aerial, useful in surface assembly (SMD), printed circuit board (PCB), microstrip applications, planar...About cable assembly, many types are available: soldered, clamp, crimp type,... for flexible and semirigid cables.

standard: IEC 169-15

### características eléctricas / electrical characteristics

impedancia característica / characteristic impedance	50 Ω
margen de frecuencia utilizable (recomendado) <i>useful frequency range (recommended)</i>	0...18 GHz
frecuencia máxima / maximum frequency	24 GHz
VSWR (depende de la frecuencia, del cable utilizado para el test y del tipo de conector / depends on frequency, cable used for testing and connector type)	< 1.05 (1 GHz) < 1.08 (5 GHz) < 1.11 (10 GHz) < 1.15 (18 GHz)
pérdida de inserción / insertion loss	<0.1 dB (1 GHz)
RF-leakage	>100 dB
resistencia del aislante / insulator resistance	> 5 GΩ
resistencia del contacto interior / inner contact resistance	< 3 mΩ
resistencia del contacto exterior / outer contact resistance	< 2 mΩ
voltaje de trabajo / working voltage	480 Vrms
voltaje de pico / peak voltage	1000 Vrms

### características mecánicas / mechanical characteristics

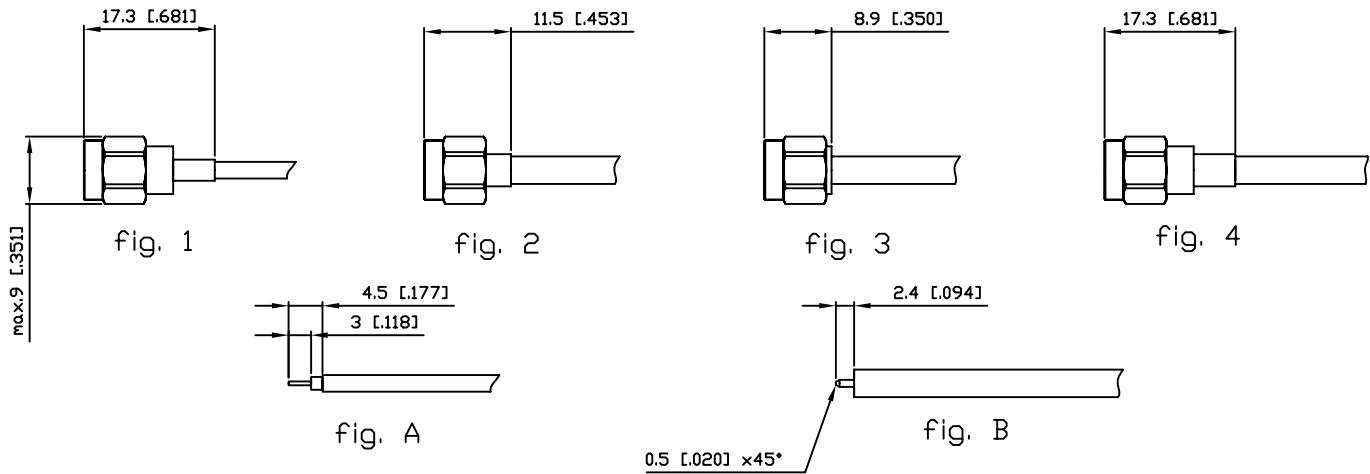

durabilidad / durability	> 500 ciclos conexión / > 500 matings
par aplicable al racord / coupling nut torque	30...60 Ncm
material aislante / insulator material	PTFE
material contactos interiores / inner contacts material.	macho / male: CuZn39Pb3 hembra / female: CuBe2
material cuerpos exteriores /outer bodies material	CuZn39Pb3
juntas estanqueidad / gaskets	silicona / silicone
acabados / finish plating	Au 1μ

### características ambientales / environmental characteristics

margen de temperatura / temperature range	-65°C....+165°C
categoría climática IEC / IEC climatic category	55/155/21
choque térmico / thermal shock	MIL-STD-202/107-B
resistencia a la humedad / moisture resistance	MIL-STD-202/106-B
resistencia a la corrosión / corrosion resistance	MIL-STD-202/101-B
resistencia a la vibración / vibration resistance	MIL-STD-202/204-B
